'Smart Grocery'

Prepared by:

Muhammad Hammizie bin Zamri (1812129)
Muhmmad Azri bin Hasin (1813785)
Muhammad Syahmi Aiman bin Mohd Shahrin (1811893)
Muhammad Hakeem Adli bin Abdul Rahim (1817151)

'Smart Grocery' is a website to educate people about grocery items or cooking ingredients, especially items that are rare or hard to recognize. The purpose of this website is to aid the people in buying and shopping at the grocery stores, or supermarkets, especially for city folks and those who don't frequent said places. This website has a search function at the homepage, so that the people can find items faster, without the need to check the categories one by one. Other than that, this website is also equipped with a page that acts like a to-do list, by allowing users to keep track of what items they plan to purchase, to enhance their shopping experience.

1. Group Contributions

All the categories are divided in twos for each team member. Each of the team members are also responsible for navigations for the four main pages: The homepage, the list page, the about page and the contact page. All the contributions are stated in **Table 1**.

Name	Contributions
Azri	- Pages: Home page, About, - Web elements: Navigation buttons - Home Page design - Using local storage to reduce complexity.
Hammizie	- Pages: Contact Us page - Event handlers for selecting a category and storage of data using JSON - Categories page design
Syahmi	- Page: List page - Storage of data using JSON - Content design - List Page Design - Home Page Design - Colour design
Hakeem	- Find proper picture for each item - Storage of data using JSON - List Page design

2. Use third party resources

Graphics: Our team members obtained all graphics for the content from pixabay.com, a website for free stock photos.

Web Elements	Team Member	Modification
Graphics for content in every item	Azri Hammizie Syahmi	All graphics are resized using CSS.
Json Objects	Azri Hammizie	All data in json were uploaded in github. Then the data were retrieved from the github links using javascript.
